### **Discolored Water Issue in Riverside Area Resolved**

In accordance with Camino Real Regional Utility Authority's (CRRUA) commitment to provide its customers timely information, CRRUA reports Some customers in the Riverside area of the Camino Real Regional Utility Authority (CRRUA) service area experienced discolored water this morning due to a well pump issue.

CRRUA technicians resolved the issue, and the discolored water is clearing up.

The pump that sends water to the Tierra Madre water tank malfunctioned, causing the water to drop to a low level.

As a result, sediments at the bottom of the water tank were disturbed causing discoloration.

Despite the discoloration the water remained safe to consume.
