Freeze Warning for Tonight

The National Weather Service is forecasting an overnight area freeze with a predicted low of 24 degrees. CRRUA offers the following tips for protecting your home against the cold:

- **Outdoor spigots and hoses:** Disconnect all hoses or lines from the spigots and cover the spigot using a cover such as the one pictured.

- **Dripping faucets:** Let an indoor faucet and those connected to exposed pipes stream a small, steady amount of water to keep water moving through the line.
- **Cabinet access:** Open cabinet doors under sinks to allow warm air to reach pipes.
- **Thermostat setting:** Maintain a consistent indoor temperature, even at night, to prevent drastic temperature fluctuations.
