Top NMED Officials Visit Sunland Park, NM

New Mexico Environment Department (NMED) Deputy Cabinet Secretary Sydney Lienemann and Division Director John Rhoderick, Water Protection Division, travelled to Sunland Park, NM on March 15, 2024, to meet with Camino Real Regional Utility Authority (CRRUA) administrative staff and city of Sunland Park officials.

In what was described as the first of many meetings, the panel began laying the groundwork for a long-term operational plan for CRRUA.

Lienemann and Rhoderick both stated their support for a team-driven, solutions-based approach to helping the water/wastewater utility resolve existing deficiencies identified by NMED in its 2023 Sanitary Survey of CRRUA and to institute a strategic plan for the future.

The CRRUA contingent provided a status report and identified funding needs to address critical infrastructure and staffing.

All agreed on the need to restore trust and credibility in CRRUA through tangible results and transparency.

The group agreed to a series of ongoing performance review and future needs meetings.
